

OF-150S-B1(B2)

15" Surface Capacitive Touch Monitor

Description

The OF-150S-B1(2), a robust metal chassis display using industry-standard surface capacitive touch technology, provides a durable, optically enhanced, and cost competitive alternative to 5-wire resistive displays used in industrial automation equipment and kiosk enclosures. The OF-150S-B1(2) display offers multiple mounting options to make integration easy and a variety of bezel options for sealing against liquids and other contaminants. A remote on-screen display module helps simplify any changes to the display image during installation or system maintenance.
