

MICROTOUCH MEDICAL-GRADE LINE OF TOUCH MONITORS.

**The foundation to a seamless user experience
and workflow.**

More important now than ever, efficiency of which an end-user can interact with an interface without hesitation, disruption, or technical breakdown plays a natural role in the progression of a clinically excellent experience. Traditionally driven by a historic categorization, this industry is carving a new path for intuitive touch interfaces that demands the utmost durability, safety, and performance driven requirements. And driving the patient experience is touch.

MicroTouch touch monitors are designed to enhance healthcare delivery and end-user experience while maintaining a durable,

compliant, and versatile product enabled by IP54 rated screens and IEC-60601-1 4th compliance. Designed for medical use, the monitors combine medical compliance requirements and a consumer-grade touch experience into one solution. The monitors can be integrated into medical equipment such as medical carts and other diagnostic equipment. They help streamline workflow by digitizing paperwork and increase productivity and efficiency in workstations.

MicroTouch Medical-Grade Solution Offering

DT-150P-M1

- Size: 15" TFT LCD
- Maximum Resolution: 1024 x 768
- Contrast Ratio: 800:1
- Aspect Ratio: 4:3
