

Driven by a history and culture of innovation, touch technology is in our DNA. With over 40 years of thought leadership in interactive device development, we remain dedicated to providing our customers with unsurpassed touch solutions and service.

With our vast industry experience and factory-direct product, MicroTouch is back to the forefront of capacitive leadership. MicroTouch customers can expect to get a broad product mix of components, monitors and touch computers, with greater efficiency and flexibility through our regional engineering, local customer support and global warehousing.
