M2-156P

15.6" Android POS System

Description

The **Mach POS is a totally new design** from MicroTouch featuring super thin and stylish 15.6" Touch screen mounted to a purpose-built base with integrated I/O ports. The design features an optional matching customer display that can attach to the base or sit on counter, creating a sleek and flexible POS countertop system.

And... **Mach POS adds payment**...both the main display and customer display can be configured with an NFC reader that is embedded BEHIND the LCD to allow for tap to pay on the screen. This NFC capability is enabled by a simple integration with any of the SoftPOS payment solutions in the marketplace.

In addition to stylish design and great features, this solution provides commercial-grade robustness plus incredible performance from MediaTek's latest processor, the Genio 520. Like other Mach products, Mach POS is equipped with bright LED panels optically bonded to a 10-point touch sensor with etched anti-glare surface. This technology increases clarity, plus avoids distracting reflections and fingerprints.

The end result is a POS solution that looks great, performs great and can thrive in all store environments.

Key Features
